

CURRICULUM VITAE (summary)

WALTER ENRIQUE VITERI ALDUNATE

Senior Geologist

Qualified Person N° 74 (Chilean Mining Commission)

Graduated from Universidad de Chile

Chilean, married

Fluent in English

SUMMARY OF EXPERTISE

Large experience in copper, gold, silver and IOCG deposits exploration

Geological evaluation of mining projects

Managing of exploration projects

Mining negotiations

Contact

Address: Callejón El Inca 250, Copiapó, Chile

PROFFESIONAL EXPERIENCE

1991 - to present: EXPLORATION AND MINING CONSULTANT

Consultant geologist in exploration projects (Cu – Au); geological evaluation of prospects and mines, prepares and recommends new targets and exploration programs at regional and district scale, field mapping, supervision and design of RC and DDH campaigns, satellite image analysis applied to mineral exploration. Generates structural models and geophysical interpretation at detailed scale. Performs negotiation of mining options for Chilean and foreign mining companies.

Clients: Allegiance Mining NL, Andina Minerals, Antofagasta Minerals, Aurex Resources, Barrick Gold, CODELCO, ENAMI, Endeavour Silver Corp., Geoexploraciones, Minera Solvex S.A., Minera Oro Maricunga, Newcrest Resources, Mineral Resources Development Ltd., Placer Dome, Proyecta S.A., Sumitomo, TVX-Normandy, Yorkton Securities, Yuma Gold, Windsor Ltda., among others.

During the last 10 years: studies of a number of mining districts and mines in the Regions of Tarapacá, Atacama, Coquimbo and Los Lagos for ENAMI. Discovery of the Cerro Las Juntas polymetallic deposit in Aysen. IOCG studies for CODELCO between Taltal and Ovalle. Evaluation with drill holes of Lomas Bayas silver district and Salamanqueja copper mine. **Discovery** and geological studies of Mostazal and Buenaventura copper projects. Exploitation as small miner of copper and gold mines in Atacama Region.

1980 - 1991: ANGLO AMERICAN CORPORATION CHILE

Exploration Manager.

Participates in the establishment and organization of Anglo American Corporation in Chile, and in the conceptual development of exploration programs. Research and evaluation for the acquisition of deposits: Mantos Blancos (Cu), El Indio (Au), Santa Rosa (Ag), Huantajaya (Ag), Carlota (Ag), Tambillos (Cu), among others. Leadership of explorations jobs that defined the precious metals belt of Maricunga district in the Andes and led to the **discovery** of the gold deposits: Refugio, Marte, Lobo, Aldebarán (Cerro Casale), Caspiche and the silver deposit: Esperanza (Chimberos). Exploration of more than 60 zones of hydrothermal alteration.

Exploration and evaluation of the Manto Verde copper mine (IOCG); exploration of new reserves for Mantos Blancos. Management for copper exploration programs in the Atacama fault zone.

1976 - 1980: MINISTRY OF ENERGY AND MINES OF VENEZUELA

Consultant geologist.

Organization and leadership of exploration programs of base metals in the Perijá Range (Venezuela-Colombia border). **Discovery** of the native copper deposit Caño Tigre in vesicular basalts. Study of massive sulfides and sedimentary copper in the Andean region. Evaluation of phosphates and limestone.

1975 - 1976: INSTITUTO DE INVESTIGACIONES GEOLOGICAS

Geologist

Participation in a porphyry copper exploration program in the belt between Chuquicamata and Quebrada Blanca.

1974 - 1975: EL TENIENTE MINE (Codelco).

Mine geologist.

Chief geologist of the southern mine. Geological mapping, planning of exploration and development drillings. Geotechnical research.

1970 - 1974: INSTITUTO DE INVESTIGACIONES GEOLOGICAS

Geologist.

Regional geology studies (1:50.000 scale), geochemical exploration of hydrothermal alteration areas and non-metallic mineral research (borax, diatomite and clay) in the mountain range of Arica. Evaluation of the Paposo mining district. Geological **discovery** and exploration of the **El Toqui and Cerro Estatuas** polymetallic districts of in Aysen Region.

OTHERS

Twelve publications in conferences and journals. Attendance to fifteenth conferences of geology. Participation in more than twenty courses and further training seminars. More than five hundred unpublished reports. Geological visits to copper, gold and polymetallic deposits in Chile, Brazil, Argentina, Venezuela, Colombia, Ecuador, EE.UU, South Africa, Namibia, Zimbabwe, Botswana, England, Spain, Sweden

December 2018
